**NOBIS**

Nordic Orthopaedic Bone Infection Symposium

## WELCOME

On 2-3 May 2024 the 1st Nordic Orthopaedic Bone Infection Symposium (NOBIS 2024) will take place in DGI-byen in Copenhagen, Denmark.

We invite all orthopaedic surgeons, infectious disease specialists, clinical microbiologists for this 2-day event.

See you in Copenhagen!

How to introduce and work with treatment by protocol

When to dare not to spare

Bacteria and defence mechanisms

When to treat with what, when and where

COMBINE\* Presentation

*\*a network for cross disciplinary research on BJI*

How to fix compliance amongst our colleague

Soft tissue management and wound care of the advanced patient

# About NOBIS

---

NOBIS is the 1st Nordic Orthopaedic Bone Infection Symposium which will unite the Nordic countries with focus on bone- and joint infections and related topics to exchange knowledge and expertise within the orthopaedic surgeons, infection specialists, and clinical microbiologist in Scandinavia. The goal is to strengthen the joined forces and bring together Nordic experts in one forum.

NOBIS will increase the common understanding of the challenges in diagnosis, surgical strategies, and medical treatment and will enlighten the value of multidisciplinary cooperation.

The symposium will include Nordic and international speakers and sessions with battles and cases.

We hope that this symposium will be the first of many future symposia that will boost the professional collaboration in our region for many years to come.

Best regards,

The Local Organising Committee
